

CARE & MAINTENANCE

Vetrazzo *Designer Collection* is an extremely durable and easy-to-maintain surface. It is comparable to granite and quartz in strength, scratch resistance, heat resistance, durability, care and maintenance.

Here are a few tips to help you keep your Vetrazzo *Designer Collection* as gorgeous as it was when first installed.

CLEANING

The surface should be wiped clean using a damp cloth. To remove dried spots or rings, use a mild detergent or liquid soap with a damp cloth.

MAINTENANCE

Do not apply any penetrating or topical sealers to any *Designer Collection* color, except for Fair Pearl, which should be sealed according to *Classic Collection* instructions (due to the presence of natural shells).

PRODUCTS TO AVOID

Some solvents and household products can damage the surface:

- Products with pumice / abrasive scrubbing pads
- Rust and paint removers
- Lacquer thinner
- Nail polish remover
- Products containing hydrofluoric acid, methylene chloride, trichloroethylene
- Products with a very high or very low PH

If contact with any of these products occurs, wipe up immediately and wash the area thoroughly with a mild soap solution, then rinse with water.

Note: *Designer Collection* is not impervious to direct contact with heat and is not fracture proof.

Be aware of these potentially damaging forces to your surfaces.
